Since Inception	YTD	1-Year	3-Year	5-Year
11.74%	-0.24%	3.10%	-0.41%	2.03%

Market Review

- The Philippine Stock Exchange Index (PSEI) was flat month on month after losing 13.46 pts or 0.2% and closed at 6,341.53. Gains made during the first half of the month were erased as the PSEI mostly traded between 6,300 and 6,500 for the month on better than average daily turnover.
- The PH economy grew by 5.4% in the first quarter of 2025. This is lower than both the government target (6% to 8%) and market estimates (~5.7%). While lower than the 5.9% growth seen in 1Q24, this was still a slight improvement from the previous quarter's 5.3% growth.
- In the local fixed income market, bond yields steepened with yields on shorter tenors down up to 17bps and yields on longer tenors higher up to 23bps. Accruals continued to be the primary positive driver of total returns for investors.
- April CPI headline inflation was at 1.4% year-on-year (YoY), lower than the March figure and the median forecast, both at 1.8%. YoY. This gave room for the BSP to continue lowering interest rates. BSP Governor Remolona suggested that 75bps worth of rate cuts is still possible for this year.
- For PH equities, the PSEI may continue to stay within the support of 6,300 and resistant of 6,600 with a slight upward bias. A strong positive catalyst such as increased foreign inflows is needed for the PSEI to break past 6,600.
- On the other hand, PH fixed income investors will likely remain defensive given the low appetite for duration. Some sovereigns are considering replacing planned long term borrowing with short term debt instead in response.
