## Market Review

- Global equities rebounded in May as consumer confidence strengthened and trade tensions eased. MSCI ACWI ended the month higher by +5.81%. U.S. equities outperformed with the S&P 500 up by +6.29% and Nasdaq-100 up by +9.13%. Other markets also posted gains in USD-terms, with Europe up +5.01%, Japan rising +4.15%, and Asia ex-Japan gaining +5.29%.

- U.S. inflation (CPI) continued to ease to 2.3% YoY in April, its lowest level since early 2021. This was also down from 2.4% in February and is below consensus expectations of 2.4%. On a monthly basis, headline CPI rose by 0.2%, driven by an increase in shelter costs. Core inflation, which excludes food and energy, steadied at 2.8% YoY as expected.

- May saw an earlier-than-expected truce between the U.S. and China. Easing trade tensions helped reduce recession fears and supported a rebound in market sentiment. However, the impact of higher effective tariff rates to inflation and overall economic growth remains to be a key concern for investors.
